EDUCATION

B.Sc. in Computer Science — Faculty of Computers and Artificial Intelligence, Cairo University, Egypt
(Grade: Very Good) **Sep 2021 – Jul 2025**

EXPERIENCE

Software Engineer (Full-time) — *Sky Ports Group, El-Sheikh Zayed City, Egypt* **Feb 2026 – Present**

- Maintain and evolve two production systems — a **Fleet Management System** and a **Terminal Management System** — built on ASP.NET Core and Angular, handling bug fixes, feature delivery, and performance tuning.
- Designed and delivered a new **Partner Portal** from scratch using ASP.NET Core (.NET 9) and Angular, enabling external partners to self-serve operational data.
- Deployed and configured **GLPI** (open-source ITSM platform) to formalize internal IT ticketing, asset tracking, and SLA workflows across the organization.
- Re-engineered the UI of the existing **Customer Portal** in Angular for better responsiveness, accessibility, and user experience.
- Operate across the full stack: backend services, REST APIs, Angular front-end, deployment, and post-release support.

.NET Backend Engineer (Full-time) — *OPUS 365, 6th of October City, Egypt* **Sep 2025 – Feb 2026**

- Developed backend services for a scalable HR Management System using ASP.NET Core with **Vertical Slice Architecture, CQRS, and the Mediator pattern**.
- Designed a dynamic employee salary tax-calculation service powered by the **OpenAI Responses API** and **JSONLogic** for storing and evaluating rule outputs.
- Built a dynamic holiday service that auto-refreshes annual dates in the database using **Hangfire**.
- Hardened observability with a logging middleware on top of **Serilog + Seq**.
- Built a Notification service over **SignalR, email, and push**; consumes events from **RabbitMQ** and uses **CAP** to implement the **Outbox Pattern** for reliable delivery.
- Owned the Attendance feature, including Clock-In with **polygon/circle geofencing** per branch, implemented with **NetTopologySuite**.

Full-Stack Developer (Internship) — *Sky Ports Group, El-Sheikh Zayed City, Egypt* **Jul 2025 – Sep 2025**

- Built a scalable Customer Portal using ASP.NET Core (.NET 9) with **Onion Architecture** and Angular 20 with lazy loading for faster load times.
- Implemented a detailed itemized purchase-requests report on Microsoft ERP using **X++**.
- Engineered an event queue linking a private VM running ManageEngine to a Google Apps Script connected to a Form via long polling, fully automating ticket creation.
- Built an **ATS** that ingests a CV PDF and a job description and returns a candidate match score.
- Set up a **CI/CD pipeline** using Jenkins, GitHub, and Docker.

.NET & Web Developer — WPF, WordPress (Part-time) — *VSRP, London, UK* **Jun 2022 – Jul 2025**

- Created and maintained 5 academic Journal WordPress sites; customized design with HTML, CSS, and JavaScript per business need.
- Built custom WordPress plugins to auto-generate metadata and structured data, improving SEO and indexability.

- Engineered a .NET WPF application that validates and cleans email lists in Excel using multi-stage checks: regex, domain existence, and SMTP/DNS mail-server existence — used to clean lists before campaigns.
- Built a bulk-email sender that pushes recipient chunks to RabbitMQ, consumed by an SMTP-sending worker service.

SOFTWARE PROJECTS

Lixora SK Pharmaceutical Manufacturing Website (Freelance) *Oct 2025 – Dec 2025*

- Engineered an e-commerce platform with ASP.NET Core using **Clean Architecture, CQRS, and the Mediator pattern**; React front-end for customers and admins.
- Asynchronous integrations with **Paymob** (payments), **SMSala** (SMS), and **AWS SES** (email) via Hangfire.
- Implemented **Idempotency middleware** (caches idempotency keys for POST/PUT) to prevent duplicate critical operations.
- Added **rate-limiting middleware** against DDoS, plus a two-tier **HybridCache** (in-memory + Redis).
- CI/CD with GitHub Actions and Docker.

Fixora — Graduation Project *Dec 2024 – Jul 2025*

- Scalable RESTful API in ASP.NET Core with **N-Tier Architecture**; real-time chat via **SignalR**; push notifications via **Firebase**.
- Automated admin reports/emails with Hangfire and the Brevo API.
- Built a price-estimator AI model that predicts service cost from user descriptions.
- CI/CD via GitHub Actions, Docker, Docker Compose, and Oracle VM.

ChatGPT User Reviews — Sentiment Classification *May 2025*

- Trained **SimpleRNN** and **LSTM** models to classify ChatGPT user reviews as positive or negative.

Handwritten Alphabet Recognition *Jan 2025 – Feb 2025*

- Trained Linear SVM, Non-Linear SVM (scikit-learn), and a Neural Network (TensorFlow) to recognize handwritten English alphabet.

Student Affairs Management System *Sep 2023 – Feb 2024*

- Implemented in Python Django (MVT pattern) with a clean UI in HTML/CSS/JS and jQuery (AJAX).

SKILLS

Languages & Frameworks	C#, ASP.NET Core, Entity Framework Core, Java, Spring Boot, Python, Django, TensorFlow, TypeScript, Angular, HTML, CSS
Architecture & Patterns	Clean Architecture, Vertical Slice Architecture, Onion, N-Tier, CQRS, Mediator, Outbox Pattern, Microservices, DDD
Data & Messaging	MS SQL Server, Redis, RabbitMQ, SignalR, Hangfire, CAP
Cloud & DevOps	AWS, Azure, Oracle Cloud, Docker, Docker Compose, Linux, GitHub Actions, Jenkins, CI/CD
Other Technical	Algorithm design & analysis, Machine Learning & NLP, Scrum / Agile / DevOps
Languages	Arabic — Native · English — Excellent
Interpersonal	Communication, Presentation, Problem-solving

COURSES & CERTIFICATIONS

- **.NET 8 Microservices: DDD, CQRS, Clean Architecture** — *Udemy* *Jul 2025 – Aug 2025*
- **Advanced SQL** — *Kaggle Learn* *May 2025 – Jun 2025*
- **Intro to Docker** — *Le Wagon* *May 2025 – Jun 2025*
- **Java Programming** — *CodSoft* *Aug 2024 – Sep 2024*
- **Complete C# Masterclass** — *Udemy* *Oct 2023 – Jun 2024*
